

Prof. dr. Egidijus Šarauskis

Egidijus Šarauskis is Professor at Institute of Agricultural Engineering and Safety of Vytautas Magnus University. He is full member of the Lithuanian Academy of Sciences, member of the Association of European Agricultural Engineers (EurAgEng), member of Joint Committee of Doctoral Study (Technological Science), member of the Council of VMU Faculty of Agricultural Engineering, Editor-in-Chief of Scientific Journal „Human and Nature Safety“ (Lithuania), member of Editorial Board or/and member of Scientific Committees of International Journals: „INMATEH – Agricultural Engineering“ (Romania), „Agricultural Engineering“ (Lithuania), „Actual Tasks on Agricultural Engineering" (Croatia), „Scientific Horizons“ (Ukraine), „Rural Development“ (Lithuania). Research area: Agricultural engineering; Engineering of soil tillage and sowing technologies; Precision agriculture; Sustainable use of resources; Agricultural machinery impact on environment; Technological, energetic and environmental assessment. Professor has five national patents. He is co-author of monograph and three book chapters published in international publisher, he has published over 250 scientific articles, of which over 60 are in CA Web of Science journals with impact factor. Professor supervised eight PhD students. Prof. Egidijus Šarauskis has executed over 30 scientific projects, in 15 of which was project leader. Also, he had more than 90 presentations at international and national scientific and scientific-practical conferences. Finally, he had internships and/or gave lectures at Universities in Germany, Belgium, and Czech Republic.
