

Assoc. prof. dr. Rolandas Domeika

Rolandas Domeika is an Acting Dean of Engineering Faculty of Agriculture Academy Vytautas Magnus University. He is Associated Professor at Department of Agricultural Engineering and Safety of Engineering Faculty. His recent research interests include smart engineering, crop harvesting technologies, energy crop processing technologies. His theoretical background is mechanical engineering. He graduated with a PhD in technological sciences at the Lithuanian Agriculture University in 1998 and became Associated Professor in 2001. The most important visits to Universities during the last 5 years: Beijing Technology University (China), University of Ibadan (Nigeria), Institute of Shankara Group, Europe Study Centre, Kreaala Agriculture University (India), Cairo University (Egypt), Zheyjiang University (China), Czech University of Life Sciences Prague (Czech Republic) and other. Finally, he has a lecture course for master students: Control of Agricultural Technological Processes, Agricultural Production Technologies and their Evaluation, Vegetables and Root Crop Harvesting Machinery and Technology.
